## Our strenghts

### Technical support and quality.

Dedicated teams constantly support production for both standard and experimental controls and tests.

### Customisation and customer focus.

We produce both in painted tinfoil (colorless exterior or with colored glazes on request / plain or with protective varnish) and PET coated.

### Decades of experience in the sector.

We are able to continuously develop innovative solutions always geared towards customer needs.

### Certified top quality recyclable raw materials

Ensuring the quality of the products supplied to the customer is an obligation for Cabagaglio.

## Technical Department

A team of experts designs and develops each component to ensure maximum performance of the final product.

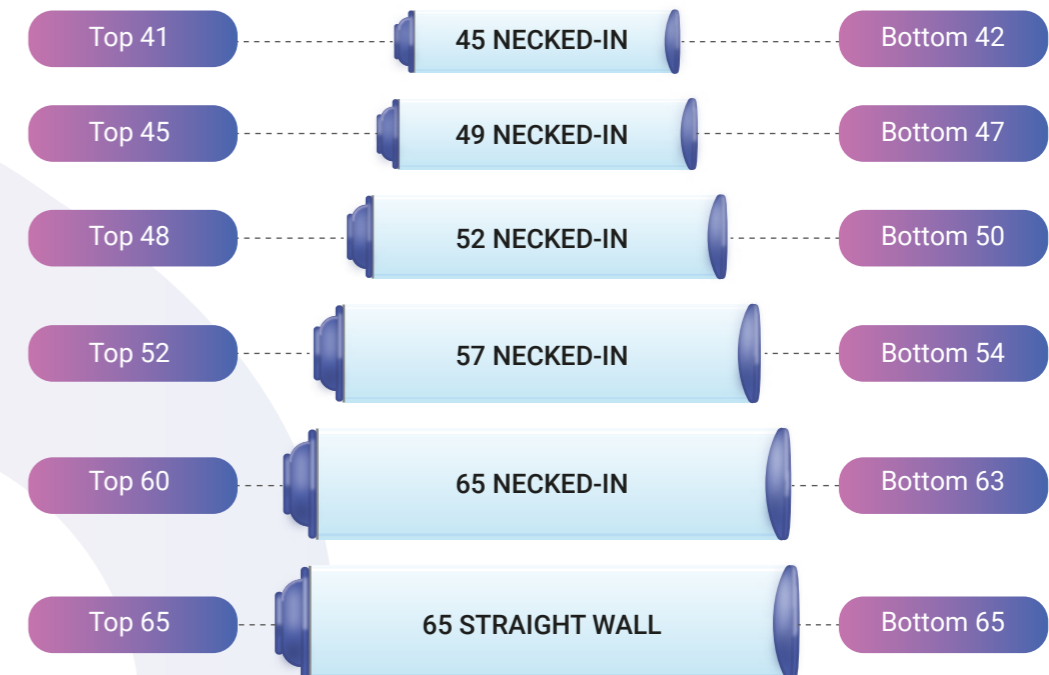

## Quality

Quality control managers test and verify production daily, following procedures fine-tuned over time by highly qualified personnel.

## Cabagaglio produces DOMES and BOTTOMS in tinfoil, **100% recyclable raw material**

Cabagaglio products range is able to meet all market demands and customized requests of the most demanding customers in terms of finishes and colours, including the application of enamels, paints and compounds. Cabagaglio is also able to produce domes and bottoms with material coated with a PET film.

All our domes can also be produced with 4.25 CH (contact height) (standard 4.00)
